Pleased By Susie I gave this book to my Mother as a gift and, when I visit her, I always look for the book to review. For those who appreciate design and today's foremost product designers it is a great book. It makes one want to seek out these collectibles (especially if you can afford some of them!). I gave it 4 stars because I wish the book had more entries in it. I, like you, read the reviews before I buy. Go ahead, it's a fun book you'll be glad you have on hand to refer back to.

Early in the 1980s, some of the world's most famous architects and industrial designers began to design a wide variety of everyday objects for the home. From tea kettles and toasters to desk lamps and dustpans, these highly designed, often whimsical products blurred the lines between form, function, and fun. Lisa Roberts, an architect and home furnishings designer, became so enamored of these objects that she set out to collect her favorites, amassing more than

300 exemplary pieces over the past 25 years. Seventy of these award-winning household objects created by such design superstars as Michael Graves, Philippe Starck, and Karim Rashid are presented in *Antiques of the Future*, a book as clever, energetic, and eye-popping as the products themselves. Each is captured in vibrant, humorous photographs, accompanied by details about the product, designer, and manufacturer and a concise explanation of why it deserves a place in the collection. Whether it's a paperweight, a salad spinner, or a blow dryer, these ordinary objects have extraordinary style. Accessible and entertaining, *Antiques of the Future* not only helps readers to develop an eye for distinctive design but also explains how they can start their own museum-quality collections.
