week because of these chemicals and my sensitive skin! But this doesn't help me. So I've been seeking for methods to get rid of soap's negative impact. And now I found *Art of Homemade Soap*. Very interesting idea to make this thing myself without special equipment, and with minimal expenses! All processes are described in the book, and are simple and clear. And pictures in the book are so attractive! All I need now is to go to the store for some ingredients. I hope to succeed in my new craft.

Homemade soaps are, as many other homemade stuff, better than the ones you can buy in the store, in my opinion. This book is a great collection of organic soap recipes. They all look good and so far all that I've tried, like the Greek Olive Oil soap or the Arabian Black Tea soap are great, too! In my opinion, I liked the Greek Olive Oil soap the most, so I highly recommend that one. The book is pretty neatly formatted, the recipe titles are pretty much self-explanatory. The instructions are clear and the ingredients are not hard to obtain, so no complaints at all. Anne Simon did a good job writing this book.

By Raymond Rice
There are a lot of great recipes inside this book! If you already make soap and are looking to expand your variety this book is a great choice. If you are new to soap making there are a lot of good recipes inside and the instructions are easy to follow. I would have given 5 stars but the title led me to believe this would be more than just recipes. This is still a great collection any soap maker should check out.
