I very much disagree with the person who said the book was not written well or well organized, It instructs you on how to make soap. It also gives you variations, for example if you want your soap to be like that Lava soap you add pumice or if you want scented soap or if you want to make laundry soap, shampoo. It also gives you instructions on how to make a wooden frame to form your soap if want one (I did not use that, I just put petroleum jelly in a 9X13 glass dish and lined it with a cotton cloth).0 of 0 people found the following review helpful. Great book!By By the seaGreat book, very informative!0 of 0 people found the following review helpful. The art of soap makingBy Diann DirksGood reference book. I spent 3 months studying soap making chemistry and this one had a lot of good tips, good tables and references for making my own formul, and it seems to have some nice pre-created ones as well, though I have not used any of them. I prefer to create my own recipies with what I have on hand. But I like having a good easy to use reference book on the subject.

Merilyn Mohr has created a complete introduction to the art of home soapmaking - a craft that appeals both to our sense of economy and to our sense of simple esthetics.
