**Wayne Hosking : Asian Kites (Asian Arts and Crafts For Creative Kids)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Asian Kites (Asian Arts and Crafts For Creative Kids):

0 of 0 people found the following review helpful. I enjoyed the information in it By Lcorpeni Although this is for kids, I enjoyed the information in it. 0 of 0 people found the following review helpful. A Good Kite Book By W. Silin I chose this book because the topic of kites was one of five available projects for my art students to pursue. Although I have made a kite before, it was a clumsy and primitive effort. Kites have begun to fascinate me, and I wanted an authoritative and artistic resource from which to share my fascination with my art students. The book is great. We are still in process of decorating and constructing these kites, so I can't tell you if they fly. But they appear as if they would. It's an inspiring book. 2 of 2 people found the following review helpful. review of Asian Kites by Wayne Hosking By David G. Herzig I own as many kite books written by Wayne Hosking as I can get my hands on. His books are not only well researched but easy to follow. I ranked this book a 4 only because of the difficulty of getting the special materials needed to build these very unique kites. I am anxious to try a few, maybe trying to adapt them to plastic materials and dowels.

Asian Kites introduces kids to the fascinating art of kite making. Through the fun and approachable projects in this book, children will learn all the steps for creating beautiful, unique and creative kites with easy-to-find materials. Children can delight themselves, their peers and their parents with projects like the Butterfly kite from China, the Thai

Cobra kite, and the Mini Wau kite from Malaysia.

From School Library Journal Grade 3-6 Likely to please both armchair enthusiasts and outdoorsy types, this survey offers brief anecdotes and legends along with carefully annotated construction diagrams for 15 simple kites commonly flown in Asia, the continent where the practice originated. Hosking opens with a historical introduction, followed by a discussion of traditional materials and low-cost alternatives, decorating advice, savvy tips for kite construction, troubleshooting, and safe launching techniques. The ensuing models are grouped by country: two each from China, Malaysia, Thailand, and Korea, and seven from Japan. Each entry features a list of supplies, an age recommendation, assembly diagrams in three to five steps, comments about individual flying characteristics, and a photo of a finished (expertly decorated) example laid out on the ground. Closing with notes on running a kite-making workshop for children, lists of associations and sources of supplies, and a relatively extensive bibliography, this title merits, and will find, a wide audience in libraries large or small.
