Ken MacTaggart : Astronaut: 1961 onwards (all roles and nationalities) (Owners' Workshop Manual) before purchasing it in order to gage whether or not it would be worth my time, and all praised Astronaut: 1961 onwards (all roles and nationalities) (Owners' Workshop Manual):

0 of 0 people found the following review helpful. Interesting ReadBy John E. PalmerThis was a informative read. The Haynes series contains a wide variety of books of this type, I have read several and have enjoyed them.0 of 0 people found the following review helpful. Great!By Keith D WeaverGreat!0 of 1 people found the following review helpful. Five StarsBy laura marquisThis is a great book. It arrived very quickly.

The book begins with early ideas about astronauts in science fiction and film portrayals of the role. It goes on to cover recruitment and the application process to become an astronaut with NASA and ESA, and the qualifications and

fitness required for various astronaut roles. The reader is taken through training for different types of astronaut roles (pilot, scientist, payload specialist, space walker, Moon walker, etc) and the different types of missions are described (sub-orbital, Earth orbit, living aboard the International Space Station (ISS), lunar flight and landing, driving on the Moon, and planned future missions to asteroids and Mars). The equipment used by astronauts is documented, including clothing, space suits, tools, backpacks, zero-gravity toilets, food stations, etc. The experience of space flight on typical missions is outlined, illustrated by the accounts of real astronauts on actual flights the experience of launch, first reactions to Zero-G, exiting the hatch for a spacewalk, the views of Earth, walking on the Moon, and re-entering the Earth's atmosphere. The book is written in a style accessible to the layperson, while including sufficient technical details to satisfy more knowledgeable readers. It also captures the excitement and wonder of spaceflight, making extensive use of astronaut biographies and interviews to uncover the real human experience, as much as technical information to provide detail to satisfy those curious about how it works.

About the Author Dr Ken MacTaggart is Co-Editor (with David Woods) of the Apollo 11 Flight Journal, NASA's official record of the mission, with accompanying technical commentary. He is also a long-standing contributor to NASA's Apollo Lunar Surface Journal. He has written for national newspapers and magazines about many space topics, including Apollo, the Space Shuttle, the MMU, Yuri Gagarin, Neil Armstrong, the Apollo 13 accident, the Russian Interkosmos programme, etc.
