0 of 0 people found the following review helpful. Cute projects but...By Coconut Earth Monkey This was not quite what I was looking for. These would be good for older children (10+) and teenagers, but are quite labor intensive for the adult if you're looking for something to do with a group of younger children who might have difficulty cutting the foam.

Fun crafts for children to make from sheets of foam. Clear photos, supply lists, easy-to follow instructions and patterns all eliminate the guesswork and make it easy to guide children through the process or let them do it themselves.
