The nostalgia for the great passenger ships of the first half of the 20th century is vividly recalled in this book on the world famous model-making firm of Bassett-Lowke, with their production of small scale waterline ship models manufactured between 1908 and 1950. Also recorded id the incredible and training purposes. Colour photographs of these 100 feet - 1 inch, and 50 feet - 1 inch models illustrates over 500 ships from small cross-channel vessels to the ocean giants, from destroyers to battleships and aircraft carriers. The book will be of great appeal to all collectors and those interested in the maritime history of the 20th century.
