The cover advertises twenty-six original designs, but the book only has sixteen color charts, and those charts are not for the best designs. There is not even a chart for the wonderful pheasant design on the front cover. I do believe that this type of book should provide charts for the designs they feature. You are paying for the book, so they are not giving you the patterns for free. Without the charts, the book is just a glorified catalog of kits for sale. Beth Russell provides a chart for every design in her books, and her kits are also for sale! My favorite designs in this book, Rabbit, Lurcher, and Squirrel, by Candace Bahouth, do have charts, but the charts are very small and take up only half of the page. They could have easily made the charts larger by moving the wool recipes and directions over to the next page instead of trying to squeeze two charts together. The pheasant on the cover is from the same series, so it would have been nice to include the pattern. If you are looking for more charts, The Ehrman Needlepoint Book has wonderful designs and provides a full color chart for every design. 2 of 2 people found the following review helpful. Birds and Beasts - Hugh EhrmanBy Nancy MorseThis man and the people who create... or created for him ...just amazing. I have learned a great deal through his advice and his choice of people who work or worked in his business as designers. One, especially, Elian McCready, was - until her untimely demise - a tremendously exquisite designer of needlepoint. There was only one of her. She learned from Kaffe Fassett. And there

is only one of him. Thanks to for having a zillion vendors with the highest of standards. Efficient service and delivery and appropriate packaging. Nancy Morse 0 of 0 people found the following review helpful. Five Stars By DrLadyGlove the photos and patternes
