I've got this booklet, the pages are not even numbered it's so brief, in my hands that has little more info than a 5 minute YouTube video. It's really just brief talking points. The introduction references 400 images and over 300 graphical presentations, I see none. It talks about trademarks and brands, I see none. There is also a reference in the conclusion about "this ebook" will give complete guidance. I see nothing even close. Also, one commenter complimented the writer. I found it to be high school level at best. Surely I'm missing something here. I have no idea what the other commenters are talking about because I don't see it. 0 of 0 people found the following review helpful. Not happy By manuel jim burnett Not happy at all .. very misleading .. there were more blank pages than worded... I feel like I only got the intro to the book and not the actual book....see how thin .. half of the pages are blank .. 0 of 0 people found the following review helpful. Waste of time By Nathaniel Goddard This is not a book, it is a short essay that is Poorly written and offers no information of value. Don't waste your time.
