SkipIf you are looking for a book that tells you the steps of how to do each specific task it brings up - this is not a manual.If you are looking for concepts for the clueless person to build wisdom (the why behind the answer) then this is the book for you!The price on this book was so low it seems way too devalued - I'd buy it for \$2.00 at least and I bought it for ~half a dollar!It includes a whole lot of common sense and is a guide to point you in the right direction when you don't know where to start. Yes you will need to do a little more research yourself for your particular situation but it has warnings about common pitfalls and helps you steer clear of bad situations!You may be the person whose mother taught you everything she knew and all her little tricks too - this book is not for you.This book is for those who didn't have mothers or whose mothers didn't teach them these things or (insert other category here so you feel included...).\*

A handy, up-to-date guide describes the most efficient and cost-effective ways to clean practically everything, with special sections on how to cope with daily cleaning regimens, eliminating germs, paint removal, oven cleaners, carpet and floor cleaning, and safe storage of cleaning supplies. Original.

.com With first aid for carpet stains (blot with white clothes, immediately) and instructions on care for bronze, silver, and cast-iron, Consumer Reports continues its efforts to educate and protect the masses. There are details on house cleaning products, furniture care, clothes washers and fabric softeners, air cleaners and hand soaps, and a full appendix on stain removal. Next time you trip with your cup of coffee, you'll wish you had some fast answers.
