A Book Every Sewing Enthusiast Should OwnBy JC82I waited not so patiently for my birthday to come around so I could finally purchase this book and when it showed up on my doorstep it did not disappoint!The first thing to grab my attention was how lovely it is! The book is a nice design and very eye-pleasing. I don't mind leaving it out and about in the house.The projects in this book are so inspiring! The ones pictured are

beautiful but I love how Bari pushes you to find the fabric choices and styles that YOU like not just copy what she has done. I've just completed making my first Crazyquilted Lampshade Cover and I'm looking forward to making more! I think my next project might be the Jean Jacket Revision using a white shirt instead of the jacket. The icing on the cake with this book are the Keeping It Real Tips! Wow, the little light bulb kept going "ding!" in my head as I read through them. The title of this book really says it all. If you don't find yourself "Inspired to Sew" something, anything after you read through it then there must be something wrong with your "Inspiration-O-Matic". Very highly recommend it!
