Not worth the money .0 of 0 people found the following review helpful. Love the authors trademark humor, terrific resource for making clever, yet practical items for the home and garden!By KCThis is a terrific book for beginners or the more experienced looking for new and different techniques. The authors share their own mistakes, in hopes you won't do the same.Great section on getting started, techniques and then the

projects. The Hexagonal tray will be my first project, then the Floral decorative birdhouse, which is very cute. There's a beautiful glass-tile bowl, a Cast-iron pot stand, made with a sheet of tiles. Very cute and an easy project to make. There's also a Rustic pot-pant holder I like, they did use barbed wire, either use smooth wire or keep it out of the reach of children.

Featuring step-by-step instructions for creating beautiful decorative mosaics, this guide will help anybody looking for a creative way to add art and color to their home. It begins with the basics, such as picking tiles and choosing the correct tools, and continues through the completion of projects, which range in difficulty and include items such as a hexagonal tray, a scrapbook bin, a mini chest of drawers, and even a bird bath. The lessons are expertly taught and explained with detailed instructions and helpful hints, so crafters can successfully reproduce the projects or use them as a basis for their own ideas.
