I was looking for a book that had good indoor/winter projects and this exceeded my expectations. If you always wanted to know how to make classy SNOWFLAKES or Cut-out dolls with their hands joined together, this book will show you how. Temko's diagrams are clear and easy to follow. You make one or 2 simple folds and cut on the dotted line. It's really that easy! Other great indoor projects include making your own greeting cards that have simple pop-ups (flower, snowman, funny face, etc). While it's a very simple intro to pop-up cards, this book is good for introducing kids to the concept. And if they've never done anything like this before, they'll be successful and not frustrated. If you're looking for activities for young school kids, this book will give you some good ideas. I used to teach school, and nothing succeeds like success. Young kids will be able to do the projects in this

The kirigami patterns are something that most people can easily do without this book. One of the reason that I bought this book was to make the gate card shown on the cover, and in the book all it shows were the list of materials and instructions on how to fold the card, but no kirigami gate pattern.0 of 0 people found the following review helpful. Excellent!By dhowertonI am using this in different units to give "hands on" activities in an ESL classroom. The projects are quick, easy and bring much needed visual enrichment to high school writing and reading studies.
