F. Virginia Walter : Super Toys Games from Paper before purchasing it in order to gage whether or not it would be worth my time, and all praised Super Toys Games from Paper:

Provides instructions for making games and toys using paper and paper products.

From School Library JournalGrade 3-6-Walter provides instructions for making toys, games, props for puppet or stage plays, and decorative centerpieces. All of the handicrafts are made from paper, cardboard, brown grocery bags, or newspaper with glue and paint. The directions are clear and simple with black pen-and-ink diagrams to supplement the text. Each craft is introduced by a full-color photo of a youngster enjoying the finished product. Occasionally, the artwork on some toys is a little too slick and sophisticated to be replicated, and there are a few lapses in directions; but for the most part, children should be able to construct a reasonable facsimile of the items shown. The proper cautions for using sharp scissors are addressed. A nonessential, but pleasing, offering.Blair Christolon, Prince William Library, Manassas, VACopyright 1993 Reed Business Information, Inc.From BooklistGr. 4-6. Crystal-clear, full-color photographs of such inventive projects as newspaper golf clubs, cardboard-tube hammers, cereal-box ice-skates, and grocery-bag magic carpets (just in time for the Aladdin craze) are the drawing cards in this activity book that includes diagrammed step-by-step directions for close to 90 paper toys and games. Directed toward adults working with kids,

the text assumes prior experience with certain materials as well as assistance in constructing such elaborate--and enticing--enterprises as a harbor, complete with a lighthouse and ships, and an airport, with a landing strip and control tower. Includes metric and standard measurements. Julie Corsaro
