**Carol Petelin : The Country Diary Book of Flowers: Drying, Pressing, and Potpourri** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Country Diary Book of Flowers: Drying, Pressing, and Potpourri:

10 of 10 people found the following review helpful. The Country Diary Book of Flowers Drying, Pressing PotpourBy Denise HoepfnerThis book is an in-depth look at drying, pressing and making pot pourri. Sometimes the author is a little too "in-depth," giving you more information than is needed.Once the reader wades through all the extras, she will uncover the necessary information needed to create some wonderful dried floral items.The author writes about

growing flowers for drying, the drying process, creating dried flower arrangements and other crafts involving dried flowers. The next section involves pressing flowers and crafts to create with pressed flowers. The pot pourri section explains the difference between scented and unscented potpourri and gives examples of flowers needed for each. The author also delves into herbs. Crafts include sachets, herb pillows and seasonal potpourri. I found the book to be interesting. I like the way the author lists the supplies you will need for each project. All in all it was a great resource. You could tell the author loves flowers and wants to spread that joy to others.

Takes a practical approach to dried flower arrangements for all occasions, with illustrations with colour photographs throughout.
