Thea Gouverneur : Thea Gouverneur's Flowers in Cross Stitc before purchasing it in order to gage whether or not it would be worth my time, and all praised Thea Gouverneur's Flowers in Cross Stitc:

A wonderful bookBy Kimberly MCarthyMy seller didn't exactly state the book's condition correctly, since the first page past the cover had been torn out. However, the rest of this large, heavy trade paperback was so perfect, and the missing page was blank I have no complaints, really. The book's contents are excellent, with many gorgeous designs of flowers that made me want to do them all. I did think there were a few too many photos of Thea's garden, which did take up space she could have used to make more designs. Still, all in all this monster book was worth what I paid for it. I can't wait to start stitching the flowers.0 of 0 people found the following review helpful. Five StarsBy Customernet all expectations0 of 0 people found the following review helpful.
